DISCRETE MATHEMATICS
VOLUME 133, NUMBERS 1–3, 15 OCTOBER 1994

CONTENTS

S.S. Abhyankar and I. Yie
Small degree coverings of the affine line in characteristic two 1

S.S. Abhyankar, J. Ou and A. Sathaye
Alternating group coverings of the affine line for characteristic two 25

A.M. Assaf
Bipacking pairs by quintuples: The case $v \equiv 13 \pmod{20}$ 47

F.W. Barnes
How many $1 \times 2 \times 4$ bricks can you get into an odd box? 55

L. Cerlienco and M. Mureddu
Generalized Robinson–Schensted correspondences: A new algorithm 79

M.N. Ellingham, R.L. Hemminger and K.E. Johnson
Contractible edges in longest cycles in non-Hamiltonian graphs 89

W. Geyer
On Tamari lattices 99

R.B. Hughes
Lower bounds on cube simplexity 123

A.V. Ivashchenko
Some properties of contractible transformations on graphs 139

Z. Jackowski
Characterizations of two classes of digraphs 147

M. Jiang and F. Ruskey
Determining the Hamilton-connectedness of certain vertex-transitive graphs 159

H. Kimura
Classification of Hadamard matrices of order 28 171

R. Klein
On the colorability of m-composed graphs 181

J. Kratochvil
Regular codes in regular graphs are difficult 191

E. Mendelsohn and P. Rodney
The existence of court balanced tournament designs 207

D.J. Rasmussen and C.D. Savage
Hamilton-connected derangement graphs on S_n 217

J.H. Schmerl
Tiling space with notched cubes 225

M.J. Schroeder
Dependence systems with the operator–image exchange property 237

Y. Shi
The number of cycles in a hamilton graph 249

B. Uhrin
The set of neighbours of a set in a point-lattice 259

S. Xu
Classes of chromatically equivalent graphs and polygon trees 267

Notes

H. Alzer
An inequality for increasing sequences and its integral analogue 279

P.L. Check and C.J. Colbourn
Concerning difference families with block size four 285

D.F. Hsu and T. Łuczak
On the k-diameter of k-regular k-connected graphs 291

S. Klavžar and U. Milutinović
Strong products of Kneser graphs 297

A. Li
On the conjecture at two counterfeit coins 301

H.S. Snevily
The snake-in-the-box problem: A new upper bouond 307

J.-M. Xu
A sufficient condition for equality of arc-connectivity and minimum degree of a digraph 315

Z.M. Song and K.M. Zhang
Neighborhood unions and Hamiltonian properties 319

K.M. Zhang, Y. Manoussakis and Z.M. Song
Complementary cycles containing a fixed arc in diregular bipartite tournments 325
